COMMUNITY

NMC

“When I got stationed here, one of the first things I did was look into education. It opens up more opportunities for me in the Coast Guard.”

Robin Phinzy, 2023 Computer Information Technology graduate and U.S. Coast Guard flight mechanic

Your home, your college, your future.

Dear Grand Traverse County residents,

Thank you for your steadfast support of Northwestern Michigan College. Together, we are building a vibrant, thriving community through education, innovation and responsive programs. In the following pages you will read stories of how NMC meets your priorities and enriches our region's quality of life. Discover how our collective efforts are shaping a brighter future for all of us.

A handwritten signature in black ink, reading 'Nick Nissley', enclosed in a thin black rectangular border.

“As a 40-year-old Navy veteran working on my third degree, this is the first education I’ve received that has led to work within the industry.”

Roger Baty, current Marine Technology student

You want jobs that offer a future and pay well.

Traditional job security is hard to find today, but you can create your own with education and skill development.

Traverse City resident Bryan Linck did it through NMC’s Aviation program.

“Aviation is just an incredible career that offers unlimited opportunities for learning, growth and earning potential,” said Linck, a 2020 graduate. Last year, he advanced to captain with Republic Airways, which will more than triple his starting salary.

Interlochen resident Cassidy Gray did it through the Dental Assistant program. For her internship, she worked at two local dental offices. Both wanted to hire her. She was employed before finishing her associate degree last May.

“A lot of people don’t want to do four years; they just want to get in and out with a good-paying job. So I think that really hits the spot. Less school for good pay,” Gray said.

Luis Uribe did it through the Automotive Technology program.

Like Gray, Uribe landed his job as a technician at a local Traverse City dealership before he graduated.

ASSOCIATE DEGREE
\$330K in higher lifetime earnings vs. high school diploma

Student study reveals microplastics in Boardman River

Last year, when NMC biology instructor Nick Roster's students sampled two dozen sites in the Boardman River, they discovered plastic particles so small they can enter the bloodstream in all but one.

Their results caught attention from media, environmental leaders and others. Keeping Grand Traverse Bay clean and healthy, which also affects recreation and tourism, means monitoring rivers and streams that feed it. The Boardman is among the biggest, and a top 10 trout stream.

"That local data could be really impactful for making real change in our communities," said Heather Smith, Waterkeeper for the Watershed Center Grand Traverse Bay.

For instance, do we need to filter drinking water? Reconsider stormwater systems or trash pickup? NMC's data will contribute to better decisions.

**They're being
real scientists.**

**My students are
already trying to
make a difference
in Traverse City
and beyond.**

Nick Roster,

Action Council

NMC offers the only bachelor's degree in Marine Technology in the nation.

Adyn McHugh was thrilled to find the perfect bachelor's degree program just a short way from home: NMC's Marine Technology program. It combines hands-on learning with outstanding job prospects.

"We have amazing field courses," said McHugh, who specializes in processing the data gathered on NMC's research vessel *Northwestern*. "I think of it as kind of a scavenger hunt. Especially when you're looking for things. We just did an assignment with a shipwreck in it."

Find out more at nmc.edu/marine

"NMC's Marine Tech has never failed for a graduate to have a job."

"New jobs are being created all the time, and those jobs are well over six figures."

Adyn McHugh, current 3rd year NMC student.

"Drones are an efficient and cost-effective way to improve outage response and right-of-way maintenance."

Cherryland Electric Cooperative

Small towns, farm fields and orchards.

NMC's Uncrewed Aerial Systems (UAS) program helps maintain the prized rural character of Up North. Since 2018, Cherryland Electric Cooperative has used drones to inspect the lines that 36,000 rural customers rely on. Between 2023 and 2024, the number of poles NMC inspected doubled.

Drones are also an important 21st century agriculture tool for applications like fertilization as well as imaging and inspection. Since 2017 Michigan State University students have traveled to NMC's UAS training facility in Yuba where they get hands-on experience that leads to a UAS in agriculture certificate.

Only 15% of the Great Lakes are mapped at high density.

NMC's research vessel *Northwestern*

To better understand issues like changing water levels and fish populations,

NMC is leading a project to map 100% of the lakebed. nmc.edu/lakebed

“Many NMC grads select Munson to start their nursing career. We consistently witness the exceptional skills and knowledge they bring to their roles.”

Tami Putney, Munson Medical Center Chief Nursing Officer; 2002 ADN graduate

You want good health care nearby.

Confidence in your caregivers isn't a nice-to-have. It's a must-have.

Among health care professionals, nurses spend the most time with patients. In northern Michigan, more nurses arrive at a patient's side via NMC than any other college—whether that be in the hospital, an urgent care, a nursing home or elsewhere.

Take Aliyah Nowlin. She started at NMC in 2020 as a dual-enrolled high school student, then earned her associate degree and RN license in 2023. This year she was the first graduate of a new, accelerated bachelor's degree in nursing (BSN) program through NMC's partnership with Davenport University. She estimates that the partnership, which includes concurrent NMC-Davenport classes, saved her more than \$3,000.

“I'm 21 and have a lifetime of nursing ahead of me.”

Aliyah Nowlin, RN, BSN,
Munson Medical Center stroke unit

“We had a need for learning and development, and NMC is an expert in that space.”

Tony Chipkewich, Sara Lee Frozen Bakery

You value education and training locally.

Employers as diverse as Sara Lee Frozen Bakery and the Grand Traverse Sheriff's Office both turned to NMC for training.

Ask any area business owner what their top priority is, and you'll hear the same thing—finding and retaining staff. So when Sara Lee Frozen Bakery decided to invest in employee training, finding the right provider was key. They turned to NMC.

Sara Lee Human Resources director Tony Chipkewich said NMC Extended Education & Training provided “a customized learning solution” to meet the precise needs of two distinct groups at its operations in Traverse City.

The training began this year and Chipkewich said discussions have already started about extending it to additional employees at other Sara Lee locations nationwide.

“Northwestern Michigan College is a rare community college that has an academic museum, the Dennos Museum Center.”

The New York Times

You want to discover, explore and connect.

Right across the street from his high school, whole new worlds open up for Arthur Lijewski-Lee.

The Traverse City Central junior is a two-time participant in Academic WorldQuest, a quiz show style competition on international politics, geography, economics, history and culture sponsored by NMC’s International Affairs Forum.

“It tickles my brain in the way that things that really interest you do,” said Lijewski-Lee, 16, whose team will return for the 11th annual competition next February. Schools including Grand Traverse Academy, Interlochen Arts Academy, St. Francis High School and Traverse City West typically compete too.

Lijewski-Lee is also an Early College student, now taking three classes at NMC. He’ll earn his associate degree a year after his high school diploma. With a PhD in his future, he’s glad for the head start.

“The people at NMC, they’re interested, engaged. That environment is more conducive to learning. It’s really nice to just be here.”

“I get to take higher level classes, which I really appreciate.”

Arthur Lijewski-Lee

10th in the U.S. for short-term study abroad

Students have traveled to 25 countries since 2013. All trips provide experiential learning for academic credit.

NEW HANGAR, HOUSING AND MORE: Intentional campus growth planned through 2034

In October, NMC broke ground on a new aviation hangar that will allow the college to double its airplane fleet. More planes mean more students can get off the two-year waiting list – first into a cockpit, then into a job with a six-figure salary.

The hangar is the first project in NMC Thrive, a 10-year campus master plan.

The plan also prioritizes new housing, since existing housing is at capacity not just on campus, but in the community.

“Every student who can live on campus reduces the pressure on Traverse City’s housing market.”

NMC President Nick Nissley

Listening to the community

To ensure academic programs stay on the leading edge, NMC draws upon the expert input of more than

500 COMMUNITY MEMBERS
who serve on program advisory boards.

Including business owners like Stephanie Lee Wiitala, of Sugar2Salt, physicians and nurses, law enforcement, retired military officers and senior citizens.

You want innovative, collaborative leaders.

With support from the Home Builders Association of Northwest Michigan, NMC is working to build more homes, faster.

By adding 3D wall printing technology to its construction technology curriculum next year, NMC plans to revolutionize the regional construction industry, address its dire housing shortage and give graduates a competitive edge in employment simultaneously.

A 3D concrete printed home can be completed in less than half the time of a traditionally-built home – 90 days versus six to nine months. It's also less labor-intensive and more sustainable. All those factors translate into lower prices. That's good news given the region's 31,000-unit housing gap, with lower priced housing in the highest demand.

"3D printing is the future of affordable homes," NMC Construction Technology Coordinator Carolyn Andrews said in a proposal that won \$116,000 in September from regional grantmaker Impact 100 to help purchase the printing equipment.
